# Kinematic Graphing - Mathematical Analysis

Study **Lessons 3 and 4** of the **1-D Kinematics** chapter at **The Physics Classroom**:

http://www.physicsclassroom.com/Class/1DKin/1DKinTOC.html

1. Consider the following graph of a car in motion. Use the graph to answer the questions.

a. Describe the motion of the car during each of the two parts of its motion.

0-5 s: _____

5-15 s: _____

b. Construct a *dot diagram* for the car's motion.

c. Determine the acceleration of the car during each of the two parts of its motion.

<u>0-5 s</u>   <u>5-15 s</u>

d. Determine the displacement of the car during each of the two parts of its motion.

<u>0-5 s</u>   <u>5-15 s</u>

e. Fill in the table and sketch position-time for this car's motion. Give particular attention to how you connect coordinate points on the graphs (curves vs. horizontals vs. diagonals).

Time (s)	Pos'n (m)

2. Consider the following graph of a car in motion. Use the graph to answer the questions.

(20 s, 15 m/s)   (30 s, 15 m/s)

(10 s, 10 m/s)

a. Describe the motion of the car during each of the four parts of its motion.

0-10 s: _____

10-20 s: _____

20-30 s: _____

30-35 s: _____

b. Construct a *dot diagram* for the car's motion.

c. Determine the acceleration of the car during each of the four parts of its motion. **PSYW**

0-10 s	10-20 s	20-30 s	30-35 s

d. Determine the displacement of the car during each of the four parts of its motion. **PSYW**

0-10 s	10-20 s	20-30 s	30-35 s

e. Fill in the table and sketch position-time for this car's motion. Give particular attention to how you connect coordinate points on the graphs (curves vs. horizontals vs. diagonals).
