

## Edit Profile Settings

When your account was created, you were sent an email with a temporary password. As a first step after your initial log in, you should edit your profile settings. On your **Account** page, tap on the **Edit Profile Settings** link.

Once the profile settings for your account opens, inspect the information and make changes as needed. There are at least three items to consider:

### 1. Change your Password

### 2. Set your Time Zone

We will use your time zone setting to determine if students completed assignments by the due date/time.

### 3. Set your Value of g

Our Calculator Pad resources uses g as a variable. The default value is 9.8 N/kg. Any calculation that uses the value of g will use this value. If you wish to change it to 10.0, then select that value from the pull-down menu.

## Account Settings

Email\*:

Anna.Einstein@physics.edu

First name:

Anna

Last name:

Einstein

Teacher Value of g in Meters / Sec / Sec:

(Default 9.8 m/s/s)

Time Zone:

(UTC-06.00) Central Time (US & Canada)

Ad Free Until:

6/12/2025
